a-list 2019
awards CELEBRATING 10 YEARS

A-List Submission Guidelines

Eligibility

Interior design, landscape and architecture professionals with projects in Connecticut OR firms in Connecticut are eligible to enter in any or all of our 17 categories. We have also added a new category to the A-List roster this year:

- **New category! Product Design**—This category will celebrate excellence and innovation in the design and execution/implementation of a custom product by the submitter. Entries for this category could include fabrics/textiles, pieces of furniture, lighting fixtures, cabinetry/millwork, hardware and more. Projects will be judged based on their creative, innovative, functional and/or aesthetic qualities. **There is no geographical requirement for the submitter in terms of where he/she lives or works for this particular category.**
 - **If a manufacturer chooses to enter a product:** He/she must do so with the consent of the designer/owner of the product and must credit the designer/owner of the product.

Submission Process

To make the submission process as easy as possible with our **improved 2019 portal**, please note the following:

- **Preparation:** To simplify the submission process, we advise gathering all of your high-res project images and having your brief project descriptions ready to go *before* starting each submission. (We recommend using Microsoft Word to gather all of your project descriptions so you can easily cut and paste into each form.) A sample application can be provided upon request.
- **Entering multiple projects into one category:** While you may enter more than one project into a single category (and we encourage you to!), you must complete each submission before starting a new draft in the same category. Therefore, we advise having your images and project descriptions ready to go before starting each submission (see “Preparation” information above).
- **Use of information:** If your project(s) is selected as a finalist by our judging panel, the information you submit in your application will be used for all publicity and coverage related to the A-List Awards. Please fill out all required application information thoroughly. A sample application can be provided upon request.
- **File size:** For optimal viewing and printing, we require high-res project images that are a minimum of 1080 x 1920 pixels and 300 pixels per inch resolution.
